

Policy Statement Environment, Noise and Sustainability

Eindhoven Airport wants to be a sustainable transportation hub where speed and experience are added values. Following this vision the environment, noise and sustainability are priorities in our policy. We feel responsible for obtaining and maintaining a sustainable aviation in the best possible way. Taking into account the importance of aviation to the economy, environmental aspects and her customers. Finding a balance between these sometimes conflicting interests is important because the quality of the living environment, an economic development and the development of a good aviation network contributes to welfare and prosperity.

Our policy principles can be converted into the following operational objectives:

- Continuous improvement of energy efficiency, environment, noise , sustainability and environmental management within the organization;
- Continuously strive for improvement in the environment, noise and sustainability and therefore providing available time, money and resources;
- Setting priorities regarding the environment;
- Compliance with the agreements with partners and suppliers and obvious mutual expectations;
- Continually encouraging partners, within the scope of the environmental management system, in the continuous improvements of energy efficiency, environment, noise and sustainable activities;
- Informing all employees and customers in easily understandable ways about issues relating to environment, noise and sustainability at the airport;
- Ensuring sufficient motivation, knowledge and expertise of employees and third parties;
- Acting on 'social care', i.e. preventing and reducing danger, damage or inconvenience in terms of air, water and soil pollution, waste and pollution;
- Maintaining a good relationship with the community and stakeholders through noise reduction and thorough complaints handling;
- Reducing CO2 emissions as optimal as possible;
- Noise reduction as optimal as possible.

Using the following policy instruments:

- Compliance with legal requirements and anticipate future legislation and regulations;
- Meeting the standards of ISO 14001 within the scope;
- Obtaining the highest accreditation level of ACI Europe in terms of CO2 reduction;
- Performing noise reduction measures as stated in the Alders advice.

The management annually sets this policy into specific objectives and targets, which are defined and quantified in the management reviews and annual reports. Eindhoven Airport will ensure a balanced consideration of all policy issues and enables the opportunity to realize this policy.

Starting point is that everyone has their own responsibility to take a genuine care to prevent adverse effects on the environment.

Signed,

Eindhoven, September 2013

Joost Meijjs
CEO
